WHAT ARE THE MAIN DIFFERENCES BETWEEN THE DAILY SUNSHINE AND SHAKEOLOGY FORMULAS?

Daily Sunshine provides key nutrients in a simple, healthy formula for kids. Shakeology is formulated for adults with a complex alchemy of exotic superfoods, adaptogens, prebiotics, digestive enzymes, and other important nutrients. While they both have unique ingredients, Daily Sunshine and Shakeology contain some overlapping essential ingredients, but at different levels in order to suit the nutritional goal of the product.

CAN ADULTS DRINK BOTH DAILY SUNSHINE AND SHAKEOLOGY?

Yes! Daily Sunshine can be used by consumers who drink Shakeology. We recommend that adults start their day with Your Daily Dose of Dense Nutrition® (Shakeology) and then drink Daily Sunshine as a healthy afternoon snack. While we recommend drinking both Shakeology and Daily Sunshine once daily, you may opt to drink another serving based on your nutritional goals.
